PUT A LID ON IT!

Keeping your employees safely on the ground.

The Right Choice.

With RMC's Automated Safety System, your drivers stay on the ground. No more climbing to the top of trailers with risk of falls and injury. Saves time when loading too.

Simplicity.

RMC didn't re-invent the wheel! We took the standard manual lid that has been around forever and automated it. No expensive gaskets to replace. Extremely easy and fast installation. To make the installation even easier, we now have color coded tubing and fittings.

Time-Tested and Durable.

RMC has been in business since 1978. Our Automated Safety System has been in operation since 2003, hauling thousands of safe loads every day. RMC has the reputation of quality and reliability. We stand behind our products.

Operate from a control box mounted on the trailer.

Technology - Maintenance

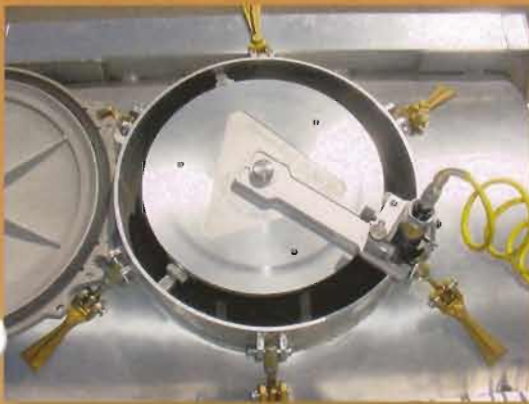

New Gasket.

RMC has developed a urethane gasket to replace the old rubber one. Won't stick - lasts longer - seals better and many other plusses too numerous to list. The best part is, it's still very inexpensive.

Resurface - Don't Replace.

RMC manufactures a ring resurfacing tool that will keep your manhole rings as good as new. In a fraction of the time and cost to cut and weld a new ring in, you can resurface, keeping your rings in tip-top shape.

Operate remotely from the cab of your truck.

The Only Choice!

RMC ENGINEERING

Automated Safety System

- All pneumatic, no electric connections required.
- All stainless steel and aluminum construction.
- Adds less than 50 lbs over manual lid.
- Lid opens over trailer, does not extend past rails.
- Adds only 4 inches height over manual lid.
- Multiple sensors to ensure a no fail safety closure system.
- One lever operation, no guessing when to seal lid.
- New 21st century gasket technology, yet inexpensive.
- Ability to seal lid manually for long term storage.
- Highest quality, durable components used in assembly.
- Quick and easy installation with little modification to ring.
- Can be operated from a Control Box mounted on the trailer or optional Wireless Remote.
